

JUST FOOD FOR DOGS' PUPSICLES COOL DOGS OFF DURING THE HOT SUMMER MONTHS

Just like their owners, dogs can refresh with natural frozen treats

In summer's heat, people take advantage of chilled drinks, ice cream and other cold treats, so why not do the same for our precious pups? Now dogs can stay just as comfortable and cool as their owners with the signature Pupsicle recipe from Just Food For Dogs.

It is a well-known fact that dogs are in danger of overheating, especially during the months of summer, as they primarily regulate their body temperature through panting—a natural activity that removes heat by passing cool air over the moist surfaces of the tongue and lungs. Southern California's coolest dog kitchen, Just Food For Dogs, developed their signature Pupsicles last summer and they quickly became a hit among the four-legged friend crowd. This summer they will release their signature recipes to be made at home in an effort to keep dogs cool everywhere.

Just Food For Dogs' signature Pupsicles are tasty, frozen, healthy dog treats that are handmade from USDA Certified human quality ingredients. Made fresh in a kitchen specifically catering to dogs, there are absolutely no preservatives, no added colors, no by-products or any other additives, and the same thing can be accomplished by following this recipe at home. These natural dog treats come in two flavors that dogs love, peanut butter-banana and beef. The "sticks" are completely edible as they are made from the same recipe as the beef and peanut butter treats. The frozen "sicle" part of the treat is yogurt based and includes all natural ingredients.

Peanut Butter-Banana Pupsicle

32 oz low-fat plain yogurt
2 mashed bananas
1/2 cup natural peanut butter
2 tablespoons honey
1 oz blueberries, chopped
Just Food For Dogs peanut butter treat

In a medium bowl, cream together mashed bananas, peanut butter and honey. Add yogurt and mix until blended. Place blueberries on the bottom of 3-oz freezable cups. Spoon yogurt mixture into cups and place in freezer until it is partially frozen, about an hour. Place a Just Food For Dogs peanut butter treat in the center of the Pupsicle to create a stick and place back in the freezer until frozen, about two hours.

Beef Pupsicles

1 cup low-fat plain yogurt
1/2 cup beef broth
Just Food For Dogs beef treat

Whisk yogurt and beef broth together until smooth. Spoon yogurt mixture into 3-oz cups and place in freezer until partially frozen. Place a Just Food For Dogs beef treat in the center of the Pupsicle to create a stick and place back in freezer until frozen, about two hours.

To make smaller Pupsicles, use an ice cube tray in place of the 3-oz cups. To feed, pop the Pupsicle out of the cup and into a bowl by pressing on the bottom of the cup. Then serve.

About Just Food For Dogs

Just Food For Dogs is a commercial, human-grade kitchen based in Southern California providing daily food for healthy dogs and custom formulations for dogs with special dietary needs, such as digestive disorders, pancreatitis, cancer, food allergies, diabetes, liver and kidney disease. All food and treats are made entirely from USDA/FDA ingredients certified for human consumption and cooked to the minimum allowed temperature to preserve the maximum nutritional value. The team behind the kitchen and recipes are composed of a veterinarian, canine nutrition expert, pet chef, and a cadre of dogs and dog lovers. Ultimately, Just Food For Dogs is a dog kitchen with one goal: to increase the quality and length of life for as many dogs as possible.
