Joint Care Supports & Protects Cartilage Matrix Tissue (60 capsules)

Probiotic Live Supports Digestion & Promotes a Healthy Intestinal Flora (60 capsules)

Our Story

The single most important element to a dog's life (after he has found the love of his human) is his daily diet. The food you put in your dog's body, more than anything else, will determine his future health, happiness, energy level and perhaps even his vet bills. We do three things here - we make daily food for healthy dogs, we make a line of prescription food for dogs with specific illnesses and we make custom formulations for vets/sick dogs. And we do it all using ingredients that are 100% certified for human consumption by the USDA. We cook our food minimally in order to maximize the nutritional value and we do it in our kitchens across Southern California. This method is much more hands on, it takes longer and costs more but it retains the nutritional value of the ingredients and, in our view, makes it the best food in the world for your dog.

More life. More years. More love.™

JustFoodForDogs.com

It's Time to Change the Way You Feed Your Dog.

**Home Cooked Meals for Your Dog,
Prepared with 100% USDA Certified Ingredients and
Absolutely No Preservatives.**

Cooked Fresh

At JustFoodForDogs® we start with the highest quality, USDA certified meats, fresh vegetables and whole grains – all of which are approved for human consumption. We gently cook our products in small batches in our kitchens across Southern California to the minimum temperature levels, maximizing the nutritional delivery to your dog. Many of the commercial dog foods on the market (in some cases the 'Premium' brands are the worst offenders) contain poor quality ingredients that are not nutritious for your dog. Even brands with less offending ingredients heat their product at such extreme temperatures for such extended time frames that any original nutritional value is reduced.

Packaged Frozen

Cooking with fresh ingredients and instantly freezing is a far superior method of making food for dogs because the nourishment is not lost in the process. In typical dog food manufacturing, potentially harmful preservatives are used in order to achieve shelf lives of up to five years at room temperature. At JustFoodForDogs we never use any preservatives and our food is vacuum sealed and frozen immediately to lock in the nutrients that are available naturally in unprocessed food. This system also allows for a reasonable shelf life of 12 months in the freezer and 3 - 6 days in the refrigerator.

Delivered to Your Door

JustFoodForDogs can be ordered online, over the phone, or in person. It can be picked up at one of our kitchens in Southern California, shipped almost anywhere in the country, or we can deliver directly to your home or office in most parts of Orange County or Los Angeles. If you live in the area and would like for us to make and deliver your order regularly (weekly, monthly, etc.) we can easily open an account for you with just your contact and payment information. All JustFoodForDogs recipes are nutritionally balanced for long term feeding.
