Low Sodium for Cardiac Health	Turkey and Macaroni* Beef and Russet Potato* [^] Lamb and Brown Rice* Venison and Squash*	Emergency and Critical Care	Balanced Remedy Renal Moderate Protein Critical Care & Neoplasia Support Consider Any Daily Diet*

* Daily diets do not need a prescription. All daily diets have passed AAFCO feeding trial criteria and have been clinically shown to boost white blood cells and antibodies in healthy dogs that were fed JFFD instead of kibble, in independent university research. Consider starting your patients on a daily diet ASAP for optimal long-term health.
