

Skin & Allergy Care

Supports the immune system against allergies, infections and tear staining

When used as a daily dog supplement, our Skin & Allergy Care supplement will support the immune system against allergies and infections.

Benefits include:

- Supports healthy immune function
- Fights infection from bacteria, viruses, molds
- Anti-cancer properties
- May help normalize blood glucose level in diabetic patients
- High-grade, human-quality supplement

SUPPLEMENT OVERVIEW

Olive leaf is one of the earliest phytomedicines. In recent years, scientists have investigated why people living in Mediterranean regions seem to suffer less from diseases associated with aging. Research has centered on the phenolic compounds found in olive products. The active ingredient **oleuropein** (oh-lee-or-oh-pin) is the principle phenolic compound found in olives, and is found in highest concentrations in olive leaves, which are used to produce our Skin & Allergy Care. **Oleuropein** is rapidly absorbed and distributed after ingestion. Pharmacological properties include antioxidant, anti-inflammatory, anti-cancer, antimicrobial, and antiviral effects. Numerous studies have demonstrated these properties.^{1,2,3,4}

SUPPLEMENT INDICATIONS

Because of the vast array of pharmacological actions, there are many uses for Skin & Allergy Care:

- A general health promotion agent in healthy dogs.
- As an adjunct treatment in dogs suffering from bacterial and viral infections such as gastroenteritis, dermatitis, ear infections, respiratory tract infections, and others.
- Evidence in humans has shown particular benefits in skin cancer treatments and prevention; its anti-cancer actions are useful as prevention in all older dogs as well as those currently suffering from cancer.
- Lastly, some research has demonstrated usefulness in diabetic animals as it helps to normalize blood glucose concentrations in animals with hyperglycemia.

RECOMMENDED USES

- For general health promotion in all dogs of all ages.
- To hasten healing of skin, ear, and other infections, including pododermatitis.
- To relieve tear staining around the eyes.
- As an adjunct treatment for bacterial, viral, or fungal infections.
- To restore normal, healthy gastrointestinal flora along with probiotics.

SAFETY

While olive leaf extract has been shown to be very safe, it is not generally necessary to exceed the dosage listed on the label. It is unlikely that accidental overdoses will result in any adverse signs. Because of its ability to lower blood glucose, carefully monitor dogs undergoing treatment for diabetes.

DOSING

Suggested initial use (6 wks) – dogs <35 lbs, 1 capsule daily; dogs >35 lbs, 2 capsules daily

Maintenance – dogs <35 lbs, 1 capsule every other day; dogs >35 lbs, 1 capsule daily

Supplement Facts

Amount Per Serving	Servings Per Container 60
Olive Leaf Extract (20% Oleuropein)(<i>Olea europaea</i>)	187.5mg (Yield: 37.5mg of Oleuropein)
