

Jumping for Joy

Sophie (featured on the cover) is an enthusiastic and outgoing twelve-year-old Boston Terrier. This active all-American beauty loved to run and play, but as she got older, joint issues greatly inhibited her mobility.

For the last several years, Sophie has suffered from joint inflammation and pain. "She was always agile and athletic, but sadly her joint issues limited what she could do," says Lane, Sophie's pet parent. "I started Sophie on Joint Care Plus about eight months ago. It was the first joint supplement that I found with hyaluronic acid, so I felt confident that it would help."

Amazingly, a month after starting Joint Care Plus, Sophie was jumping on and off the bed—something she hadn't done in three years. "She now has the same mobility she had when she was half her age," says Lane. "Her energy is back, and we are all grateful for more playtime!"

Why Use Joint Care Plus?

Vets and pet parents alike have asked us for an easy way to deliver the benefits of our most popular veterinary support recipe, Joint and Skin Support, to dogs eating one of our other healthy recipes. The answer: JustFoodForDogs Joint Care Plus.

Based on the same effective nutraceuticals found in our Joint and Skin Support recipe, Joint Care Plus can be used as a stand-alone solution or can be the perfect complement to our Joint Care supplement or other glucosamine products.

Unique Mix of Natural Ingredients

Joint Care Plus is a truly unique supplement. No other pet product contains these three highly effective ingredients:

Collagen type II is a naturally occurring source of the most bioavailable and researched nutraceuticals for joint health: hyaluronic acid, chondroitin and glucosamine. Clinical studies have found Collagen type II to be safe and effective in treating joint inflammation, secondary mobility and skin dryness.

Hyaluronic acid is a natural structural component of skin and connective tissue of animals and humans. It's considered to have a greater capacity to hold moisture than any other natural polymer, lubricating joints and providing comfort.

Chondroitin sulfate is a biomolecule normally found in cartilage around joints in the body. Naturally derived from animal sources, it helps protect cartilage in joints from breaking down and has been reported to reduce joint damage and slow disease progression in osteoarthritis.

Count on Joint Care Plus

Joint Care plus is formulated to:

- Protect connective tissue
- Improve joint mobility
- Reduce joint pain and inflammation
- Support the skin barrier

A great stand-alone supplement, Joint Care Plus is also the perfect complement to Joint Care and Omega Plus. Together, these supplements provide the best possible nutraceutical support for your dog's joints.

Veterinarian Developed

Our veterinary supplements address the most common ailments found in dogs. Designed by our board-certified veterinary toxicologist, Dr. John Tegzes, VMD, Dipl. ABVT, in collaboration with JustFoodForDogs Chief Medical Officer Dr. Oscar Chavez, our supplements are a perfect complement to our whole-food nutrition products.

All our JustFoodForDogs veterinary supplements are made in an FDA-certified facility and manufactured under Good Manufacturing Practice (GMP) guidelines. Made only with human-quality ingredients, JustFoodForDogs supplements are safe for people as well.

These statements have not been evaluated by the FDA. These products are not intended to diagnose, treat, cure or prevent any disease.
