

## A Whole New Ballgame

To say that Rosy (featured on the cover) is a ball dog would be an understatement. Tennis balls, rubber balls, squeaky balls, you name it; she's never without one. In fact, endlessly chasing a ball on the beach is Rosy's idea of a perfect day.

Two years ago, Rosy developed a limp in one of her hind legs that threatened her mobility. X-rays showed hip dysplasia and the vet recommended surgery on both hips. "An acquaintance suggested we first try JustFoodForDogs Joint Care, saying that it had worked miracles on his aging dog," says Annette, Rosy's pet parent. "I immediately ordered a bottle and began giving her a capsule every day with her food."

Rosy has not limped since and chases her ball like a puppy. Thanks to Joint Care and its natural nutraceuticals, this active 10-year-old is still the belle of the ball.

## Recipes

-  **Beef and Russet Potato**  
Avail in 18 oz., 72 oz.
-  **Lamb and Brown Rice**  
Avail in 18 oz., 72 oz.
-  **Turkey and Whole Wheat Macaroni**

Other ingredients: Gelatin (capsule), Microcrystalline Cellulose, Magnesium Stearate, Silicon Dioxide and Water.

Dr. John Tegzes, VMD Dipl. ABVT  
Dr. Oscar Chavez, BVetMed MRCVS, MBA

## Why Use Joint Care?

It is challenging for dogs to maintain an active lifestyle when they suffer stress on joints and bones from things like:

- The discomfort of daily exercise
- Arthritis
- Disc degeneration
- Hip dysplasia

JustFoodForDogs Joint Care is made using proven natural nutraceuticals that can help treat joint issues in older dogs and help younger dogs avoid joint complications later in life.

## Made with Natural Glucosamine

Joint Care is formulated from two naturally restorative ingredients that support the structural integrity of joints and connective tissues: glucosamine sulfate and chondroitin sulfate.

Unlike glucosamine hydrochloride, a synthetic form of glucosamine commonly used in animal products, Joint Care is formulated with naturally occurring glucosamine sulfate found

in the fluid within joints. Studies in humans have demonstrated its effectiveness in treating osteoarthritis, and studies in dogs have shown improvement in pain scores and overall activity.

Chondroitin sulfate is a biomolecule normally found in cartilage around joints in the body. Naturally derived from animal sources, it helps protect cartilage in joints from breaking down and has been reported to reduce joint damage and slow disease progression in osteoarthritis.

## Count on Joint Care

Joint Care helps dogs continue to do the things that they enjoy most such as running, fetching and hiking. Its anti-inflammatory properties and natural restorative ingredients help:

- Support normal joint flexibility and functioning
- Stimulate bone cartilage production and bone health
- Reduce aches and discomfort from regular exercise
- Treat the effects of arthritis

A great stand-alone supplement, Joint Care is also the perfect complement to Joint Care Plus and Omega Plus. Together, these supplements provide the best possible nutraceutical support for your dog's joints.

## Veterinarian Developed

Our veterinary supplements address the most common ailments found in dogs. Designed by our board-certified veterinary toxicologist, Dr. John Tegzes, VMD, Dipl. ABVT, in collaboration with JustFoodForDogs Chief Medical Officer Dr. Oscar Chavez, our supplements are a perfect complement to our whole-food nutrition products.

All our JustFoodForDogs veterinary supplements are made in an FDA-certified facility and manufactured under Good Manufacturing Practice (GMP) guidelines. Made only with human-quality ingredients, JustFoodForDogs supplements are safe for people as well.
