

## Boosting Brinkley's Immune System

As befitting a dog born on Valentine's Day, Brinkley (featured on the cover) loves everyone: people, dogs, cats and even the family's pet rabbit. Rescued when she was two years old, Brinkley quickly became an integral part of her new family and the most popular dog in the neighborhood.

Despite her popularity, Brinkley was not immune to intestinal disorders. She frequently suffered from gastrointestinal issues such as diarrhea, soft stools and occasional vomiting. At the recommendation of a veterinarian, Brinkley began taking Probiotic Live to boost her immune system and improve her digestive health.

"We mixed the probiotics into each meal and the results were amazing," says Angela, Brinkley's pet parent. "In short order, Brinkley's digestive issues resolved themselves and she is back to her old self, ready to go when the doorbell rings and someone asks, 'Can Brinkley come out to play?'"

## Recipes

-  **Beef and Russet Potato**  
Avail in 18 oz., 72 oz.
-  **Lamb and Brown Rice**  
Avail in 18 oz., 72 oz.
-  **Turkey and Whole Wheat Macaroni**  
Avail in 18 oz., 72 oz.

## Why Use Probiotic Live?

Probiotic Live is beneficial in the treatment of a variety of issues in dogs, including:

- GI tract disorders
- Constipation
- Diarrhea
- Flatulence
- Bad breath
- Yeast infections
- Allergies

Probiotic Live is also helpful during and after a treatment of oral antibiotics. Antibiotics, while effective at eradicating disease-causing bacteria, also can inadvertently destroy beneficial bacteria in the GI tract. Probiotics can help reestablish these beneficial bacteria.

## Proprietary Blend of Healthy Microorganisms

Probiotic Live is a blend of six strains of helpful microorganisms carefully selected and balanced to promote healthy digestion in dogs. Each dose contains 5 billion colony-forming units or CFUs. These organisms have been spray-dried

(versus freeze-dried) to maintain viability, which allows for quick activation after administration. Probiotic Live needs to be stored in a refrigerator.

## Count on Probiotic Live

Scientific research has shown that the GI tract, which includes the stomach, small intestine and large intestine, is alive with microorganisms that help to process food and facilitate the absorption of nutrients. Probiotics provide beneficial organisms that compete with and replace harmful microorganisms in the GI tract.

As a result, Probiotic Live helps dogs:

- Maintain a healthy digestive tract
- Absorb critical nutrients, energy and moisture
- Fight off potential pathogens

Furthermore, new research also shows that a healthy GI tract improves overall immune functioning, which is helpful in combating and preventing infectious diseases.

## Veterinarian Developed

Our veterinary supplements address the most common ailments found in dogs. Designed by our board-certified veterinary toxicologist, Dr. John Tegzes, VMD, Dipl. ABVT, in collaboration with JustFoodForDogs Chief Medical Officer Dr. Oscar Chavez, our supplements are a perfect complement to our whole-food nutrition products.

All our JustFoodForDogs veterinary supplements are made in an FDA-certified facility and manufactured under Good Manufacturing Practice (GMP) guidelines. Made only with human-quality ingredients, JustFoodForDogs supplements are safe for people as well.

*These statements have not been evaluated by the FDA. These products are not intended to diagnose, treat, cure or prevent any disease.*
